

MEHRAN KHANI

SENIOR BACKEND ENGINEER — PHP / LARAVEL Remote · UTC+03:30

mhrnkhny@gmail.com +98 910 744 8727 [linkedin.com/in/mehran-khani-044342177](https://www.linkedin.com/in/mehran-khani-044342177)

PROFILE

Backend engineer with over seven years of experience building web products, with deep specialisation in Laravel. Work has ranged from designing high-load APIs to implementing content management systems and complex commercial applications. Alongside PHP/Laravel, works server-side with NestJS and Python, and client-side with Next.js and Vue.js, and can therefore take a product end to end. Comfortable across relational databases (PostgreSQL, MySQL), NoSQL (MongoDB) and Redis for caching and queue management. Consistent focus on clean architecture, security, testing and performance — code that works today and can still be developed tomorrow.

TECHNICAL SKILLS

LANGUAGES	PHP, Python, JavaScript	BACKEND	Laravel, Livewire, Filament, NestJS, Django, RESTful API design, package development
FRONTEND	Next.js, Vue.js, HTML, CSS	DATA	PostgreSQL, MySQL, MongoDB, Redis, RabbitMQ
PLATFORM	Docker & Compose, Linux (Ubuntu), Git, CI/CD, DevOps practice	PRACTICES	Clean architecture, SOLID, design patterns, unit testing, multi-tenant systems, query and cache optimisation, AI-assisted development

EXPERIENCE

Backend Lead & Product Owner — Migroto

Select Visa (Australia) · Remote

Dec 2025 — Present

- Own the design and development of the technical infrastructure of Migroto, an AI-driven SaaS platform in immigration technology, and lead the backend team.
- Direct product strategy for Australian migration: eligibility assessment, skilled-visa points calculation, occupation-demand analysis and personalised migration roadmaps.
- Combine up-to-date official migration data with AI analysis and review by registered migration specialists, so applicants can assess their path before committing to language tests and skills assessments.
- Run user-needs analysis, feature design and UX optimisation alongside system architecture, aligning product development with business goals.

Backend Team Lead & Product Manager

Sep 2024 — Nov 2025

Medi Media (Naji Research Company) · Tehran

- Led the backend team and owned the product in digital health: hospital information systems (HIS), clinic management, prescription writing and electronic prescription submission to Iran's Social Security and complementary health insurers.
- Delivered clinic and private-practice modules covering inventory, reception, appointment management and patient follow-up.
- Built the national school-transport platform Sahand (Taxi-Owladein): modular, scalable Laravel backend, a Filament admin panel for multi-level oversight, GPS live tracking, driver and parent applications, multi-level authentication and role-based access for police, municipalities, schools and taxi contractors.

Laravel Developer

Sep 2020 — Aug 2024

Kian Tejarat Sharif · Tehran

- Built and shipped client web and mobile platforms across e-commerce, legal services, tourism and industrial automation — including multilingual marketplaces for Iraq and Oman and a nationwide poultry-feed monitoring system.
- Designed RESTful APIs consumed by iOS, Android and PWA clients, with order tracking, payment-gateway integration and online support flows.
- Handled data modelling, admin panels and deployment for each product; see the project appendix for the full list.

Laravel Developer

Apr 2019 — Aug 2020

Rahkar Hooshmand Iranian · Tehran

- Developed Laravel web applications and administrative panels, and built the legal-services platform DigiHagh for lawyers and their clients.
- Implemented case management with document upload, in-app messaging between lawyers and clients, and confidential handling of case data.

EDUCATION & TRAINING

BSc Computer Engineering — Software Engineering

Oct 2016 — Present

Damghan University, Semnan Province, Iran · GPA 15/20

Laravel Development — 40-hour certified course

2018

University of Tehran

LANGUAGES & TOOLS

LANGUAGES	Persian — native. English — intermediate (CEFR B1), working proficiency in reading and written technical communication.
TOOLING	PhpStorm, PyCharm, VS Code, Postman, pgAdmin, MongoDB Compass, Termius, Warp, Docker Compose

APPENDIX — SELECTED PROJECTS

Nineteen delivered products, most recent first. Role is backend design and implementation unless stated otherwise.

Migroto

Select Visa · 2025

AI-based SaaS platform for Australian migration: eligibility assessment, points calculator, occupation-demand analysis, personalised roadmaps and AI advice reviewed by registered agents. migroto.com

Kariva

Karo · 2025

SaaS platform for multi-model AI software delivery — product planning, architecture proposal, build, deploy and monitoring. Multi-tenant Laravel backend, task routing across Claude, Codex and specialist models, token metering, billing and subscription plans; Next.js front end with project dashboards and a client review panel. kariva.dev

Flowra

Karo · 2025

Action-centred work management platform uniting tasks, meetings, chat, files and financial contracts in one context. Activity log, real-time and Telegram notifications, two-step login via a Telegram bot, session management, full RTL/LTR support, Jalali and Gregorian calendars, multi-currency finance module with CSV export. flowra.work

Tourbin / VisaPlus

Karo · 2025

Tour booking marketplace and multi-tenant tour management system with a dedicated panel per operator: isolated data and access per tenant, Next.js front end with country, city and tour-type search, Redis caching. visaplus.pro

YourPass

Karo · 2025

Event discovery and ticketing platform for Dubai and Istanbul — concerts, festivals and nightlife. Payment-gateway integration, digital QR passes, multi-city and multi-currency support, capacity management and Redis-backed concurrent ticket sales. yourpass.net

Karo Spaces

Karo · 2025

Website and platform for a studio venture in digital products, SaaS, animation and creative tools. Laravel REST APIs for content, users and services; Next.js front end focused on SEO, PWA support and performance; bilingual (Persian/English) structure. karo.studio

Ozz Academy

Karo · 2025

Online learning platform (LMS) covering courses, lessons, users, enrolment and payment. Payment-gateway and subscription handling, student/instructor/admin access levels, query optimisation and Redis caching. ozz.academy

Tottem

Karo · 2025

Wellness companion platform supporting users while they wait for specialist mental-health care. Backend built with particular attention to security and data privacy, secure authentication, session management and a database structure tuned for fast response. tottem.me

Petdoon

Karo · 2025

Social network and matching platform for pets: pet and owner profiles, matching and likes, real-time PetChat over WebSocket and Redis, geo-location search for nearby shops and clinics, and events with registration. petdoon.com

Sahand (Taxi-Owladein) Naji Research · 2025	National school-transport management system for safer student journeys: modular scalable Laravel backend, Filament admin for multi-level oversight, GPS live tracking, parent and driver apps with arrival alerts, multi-level authentication, role-based access for police, municipalities, schools and taxi contractors, and analytics dashboards for fleet status, violations and fuel use.
Medi Media Naji Research · 2024	Digital health suite: doctor appointment booking, online consultation and visits, electronic prescription and electronic patient records. medimedia.ir
Bastak Kian Tejarat Sharif · 2025	Automation system and web application for poultry and animal-feed factories, built to monitor national feed consumption. Collects and analyses accurate consumption data from farms and production units online, reducing resource waste and supporting production planning. bastak-pwa.iran.liara.run
Jihani Mobile Kian Tejarat Sharif · 2023	Multilingual mobile marketplace for phones and spare parts, operating from Sulaymaniyah, Iraq. Order tracking, reviews and online support; published on the App Store and Google Play.
Delifier Kian Tejarat Sharif · 2023	Quick-commerce grocery web application for Oman, comparable to Snapp Market in Iran: fully organised purchase flow from store picking to courier delivery, returns and refunds, live order status, online support and logistics tooling to cut waiting time.
Timche Plus Kian Tejarat Sharif · 2022	Nationwide online store for plastic and single-use consumer products: broad catalogue, online ordering, fast nationwide distribution network, after-sales support and secure payment. timcheplus.ir
Fankesht Kian Tejarat Sharif · 2022	Marketplace for agricultural and horticultural equipment — tractors, planting and harvesting machinery, irrigation systems, sprayers and hand tools — with detailed product specifications, deep categorisation and advanced search by type, brand, price and technical attributes. fankesht.com
Ternido Kian Tejarat Sharif · 2021	Service-marketplace application connecting users and local businesses in Qazvin, later extended into a single ecosystem with separate user and business editions so businesses could offer services at national scale. ternido.com
DigiHagh Rahkar Hooshmand · 2021	Legal-services web application connecting clients with experienced lawyers: lawyer profiles with credentials and specialities, online case management with document upload, direct in-app messaging, case assessment, and confidential handling of user data. dighagh.com
Ostakish Kian Tejarat Sharif · 2020	Web and mobile application aggregating services on the islands of Kish and Qeshm — accommodation, shopping, health, technical services, leisure and tourism — in one accessible platform. ostakish.com
